many more!

You know that most, if not all, American music can trace its roots back to New Orleans. But did you know that the New Orleans Musicians' Clinic & Assistance Foundation is making sure that the music continues to flow out of the Crescent City for generations to come? For over a decade, the NOMC has become a health care beacon to New Orleans music and musicians.

On the original "Get You a Healin'" CD released locally just over a decade ago, NOMC wanted to gain local awareness and support for musicians health care and well being. Since then, New Orleans musicians and their music have definitely needed a healin'. And they're doing it for themselves by donating music to the clinic but need your help passing on their musical message. *Please help by promoting the digital only re-release of this amazing compilation of original music by a wide range of New Orleans legends as well as an additional 10 Bonus Tracks from National Artists* who also appreciate the music and musicians of New Orleans.
