

QUICK TIPS FOR PROTECTING YOUR HOME FROM MOSQUITOS

Eliminate standing water around your home, this is where mosquitoes breed!

Remove trash, old tires and other items that can hold water and are sitting on your property. Turn over buckets, trashcans, children's toys or anything that could collect water.

For containers that can't be removed, such as pet dishes, bird baths, or plant saucers, drop some mosquito bits or dunks into the water to kill mosquito larvae before they're old enough to bite!

Use air-conditioning or make sure window and door screens are in good repair to prevent mosquitoes from getting inside. If your screens have any holes or tears, consider hanging a mosquito net over your bed at nighttime.

CHOOSING THE RIGHT INSECT REPELLANT

Look for these ingredients and brand names on the label!

Use an insect repellent with one of the following active ingredients:

Active ingredient

Higher percentages of active ingredient provide longer protection

Some brand name examples*

(Insect repellents may be sold under different brand names overseas.)

DEET		Off!, Cutter, Sawyer, Ultrathon
Picaridin , also known as KBR 3023 , Bayrepel , and icaridin		Skin So Soft Bug Guard Plus, Autan (outside the United States)
Oil of lemon eucalyptus (OLE) or para-menthane-diol (PMD)		Repel
IR3535		Skin So Soft Bug Guard Plus Expedition, SkinSmart

TRAVELING PERFORMERS!

If you are going on tour to areas of the world where Zika virus is found, it is important you take the right precautions to protect yourself from mosquito bites. For country specific travel information and recommendations, visit www.cdc.gov/travel.
